(For free and not actually for sale) -Â .BARRING any price drop, there is little doubt the Dallas Cowboys are the best team in the NFL this season. So let's figure out what it would take for them to become the first team to win the Super Bowl since the New England Patriots in 2004. Here are four major positions the Cowboys need to have a successful season and why they need to improve in those areas. C – Travis Frederick There will be plenty of discussion on the effect Cowboys star centre Travis Frederick's (R) concussion suffered in their first game against the Philadelphia Eagles had on his play in Week 2. He then suffered a mild concussion in a Week 3 win against the Seattle Seahawks, which would lead one to think he has a long road back. But the Cowboys have overcome the loss of Frederick in the past, most notably in 2015 when All-Pro guard Zack Martin (R) missed the entire season because of a second ACL tear. He came back in Week 6 against the San Diego Chargers, but only appeared in three games in the regular season. So with all that being said, it's a great problem for the Cowboys to have. Having two All-Pro centre-backs is an incredible luxury and allows them to turn to veteran Chaz Green (No. 53) for much needed depth. One of the reasons the Cowboys were able to go as far as they have without Martin is the great play of Green, who started out his career in Buffalo and spent time in Tennessee. He was their starter for his first six seasons in Dallas and started all 14 games in the playoffs as the Cowboys knocked

Therefore, the basic..Q: Is it possible for a list to be a List of Lists? I'm trying to do this: List> ListofLists = new List>(); and I get the error: System.ArgumentException: 'Item must be an array type: type System.Collections.Generic.List`1[System.String]. The list property can only be set for list items with array types.' I've tried it with string and it works just fine, so I know it's because the item element isn't an array. Is it possible to do this? If so, how? A: You're using List>, which is not what you want. Use List. Here is the relevant MSDN documentation. A: You could use List>, but there's no reason you couldn't just use List f30f4ceada
